Index for 1956
Vol. 28, Nos. 1-12

Heating Piping & Air Conditioning

INDUSTRIAL • COMMERCIAL • INSTITUTIONAL • PUBLIC BUILDINGS

. . . including the Journal of the
American Society of Heating and Air-Conditioning Engineers

"Most Informative, Most Authoritative, Most Quoted"

HEATING, PIPING & AIR CONDITIONING regularly runs more pages of editorial material on the subjects of heating, piping, and air conditioning in industrial, commercial, institutional, and public buildings than any other publication. During 1956, for example, there were 238 pages on heating, 159 pages on piping, and 362 pages on air conditioning — in addition to many, many pages of news, equipment developments, a complete Directory Section, etc. . . . . By actual count, articles in HPAC are "most quoted" in the leading text-books and handbooks in the field. . . . . HPAC's articles are written by authorities actively engaged in the field served.

For convenient use, the articles indexed have been classified and subclassified under the major headings and under subheadings. They have also been classified as general, fundamental, and by types of plants and buildings. There is also an index by authors.

Heating, Piping & Air Conditioning is published monthly by Keeney Publishing Co., 6 N. Michigan Ave., Chicago 2, Ill.

Heating, Piping & Air Conditioning

January-December 1956 — Vol. 28, Nos. 1-12

Published monthly by the Keeney Publishing Company, 6 N. Michigan Ave., Chicago 2, Ill.

The index to the JOURNAL SECTION of the AMERICAN SOCIETY OF HEATING AND AIR-CONDITIONING ENGINEERS is separate (see page xxii).

This index does not include Equipment Developments; Recent Trade Literature; Meetings & Conventions; Who's What—departments appearing regularly in each issue. The Editors' Pages in each issue include items of news, comments on current events, etc. In the January issue a complete directory section was published covering heating, piping and air conditioning equipment for industry and large buildings.
